Universitätsklinikum  
Halle (Saale)

# Treatment of Elderly Patients: The Challenge of the Future

- meeting language English -

Dear colleagues,

A great number of elderly patients will reach the hospitals in the future when the baby boomer generation will get old. Nobody is really prepared for this tsunami like increase of multi-morbid patients. Gerontologists and Geriatrics from all fields should work together to understand the challenges of the treatment of such elderly patients. Translational research will therefore be of major interest in the future.

The purpose of this meeting is (1) to make the general public more aware of the problems of elderly patients, (2) to promote greater communication among the worldwide community of individuals engaged in ageing research and (3) to invite young students to join this field of research.

The congress will be the 7th international meeting on ageing in Halle (Saale) and thereby hopefully further develop to a focus on ageing research in Germany. It will comprise invited talks and poster sessions. There will be no concurrent sessions.

We are looking forward to welcoming you to Halle (Saale) for a most exciting and enjoyable meeting.

Cordially,

Andreas Simm

## Friday September 25<sup>th</sup> 2015

Stadthaus Halle – City Building Halle

### 18:00 Opening

Andreas Simm

### Address

M. Gekle, Dean of the Medical Faculty  
R.-E. Silber, Heart Centre University Hospital Halle
