

With more than 500 years of history, the Martin Luther University Halle-Wittenberg is one of oldest universities in Germany. Located in Halle (Saale), the hometown of Georg Friedrich Händel, the Medical Faculty of the MLU exists since 1694. The Institute for Physiological Chemistry (IPC) represents the biochemistry and molecular biology division within the Medical Faculty. We are engaged in basic biomedical research, investigating principle questions of cell biology, tumor biology and differentiation processes.

# Postdoc position in Molecular Tumor Cell Biology

**The Institute for Physiological Chemistry (IPC)** of the Medical Faculty of the Martin Luther University Halle-Wittenberg is looking for a Postdoctoral Research Associate (TV-L E13).

The position is in the department „Gene Regulation“, which is interested in the regulation of gene expression, cell motility and cell adhesion. Currently we investigate the actin-regulated transcription factors of the MRTF family and the cytoskeletal adapter protein Tensin (Mol Cell Biol. 2016, 36:1526-1539; Journal of Cell Science 2017, 130:2172-2184; Breast Cancer Research 2017, 19:68).

Successful candidates will have a PhD in relevant research areas and a first author publication in a respected journal. Candidates are expected to work independently as well as in a team, and to complement the department's focus and methodology. Excellent communication skills in German and English are mandatory.

We offer the opportunity to obtain the “habilitation”. Teaching comprises seminars and practical courses in biochemistry/molecular biology for students of medicine. All teaching is in German. The position is initially for three years; extension for another three years is possible.

To apply, please include a CV, statement of interest, PhD summary and certificates until July 26, 2019. For questions and applications:
